MORE THAN A CLEAN SOLUTION

EXHAUST EXTRACTION SOLUTIONS FOR VEHICLE WORKSHOPS

**Our Standards
are Special**

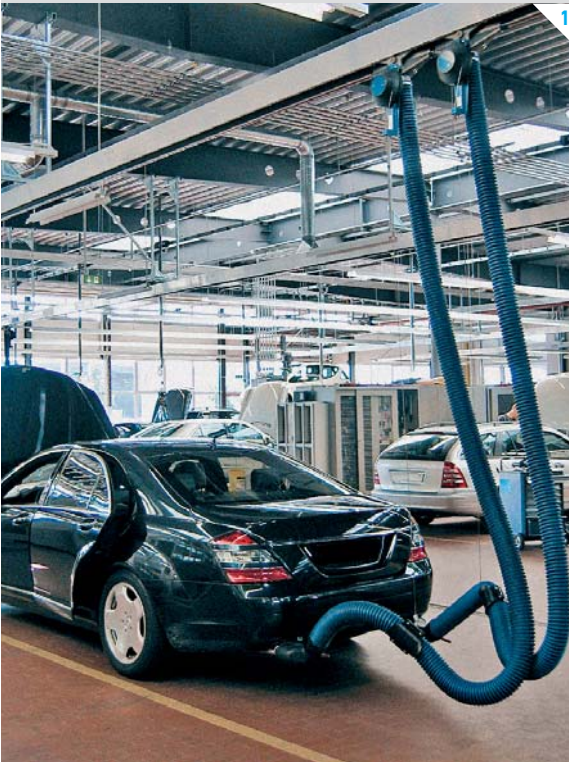

Solutions for Cars

1 2 Extraction Rails for the Car Workshop:

Extraction points are fully moveable. The modular nature of the system allows easy modification for future expansion if required.

3 Underfloor Exhaust Extraction System with NORFI:

patented hose carrier to reduce hose contamination.

4 Exhaust Hose Reels:

Compact design with integrated extraction fan. When not in use the hose is recovered onto the reel for safe storage.

Solutions for Trucks

5 6 Exhaust Extraction:

Exhaust extraction rails for stationary and moving applications. NORFI even has rails to suit large commercial and military vehicles. The modular design means that future expansion is easily achieved.

7 Exhaust Hose Reels:

Exhaust hose reels for large commercial vehicles. NORFI's compact design allows for a wide range of hose diameters and lengths to suit a variety of applications.

8 Suction Swivel Arms:

Suction swivel arm for vertical exhaust pipes. The arm can be easily rotated and is height adjustable from floor level. Also available with low level exhaust extraction facility.

Special Solutions

9 Extraction Equipment for Test Stands:

The system is easily adjustable to cater for virtually all exhaust pipe variants, and can be moved in the extraction rail for safe storage when not in use.

10 Suction Arms for Trucks:

Suction arm for trucks with overhead or low level exhaust pipes. The arm is easily adjustable from floor level and the hood can be rotated, raised and tilted.

11 Exhaust Nozzles:

NORFI has a range of nozzles and adapters to suit all makes of vehicles. A special adapter is shown catering for a twin exhaust.

12 Weld Fume Extraction Arm:

The external parallelogram construction makes the arm smooth and easy to position, and as there are no friction joints this arm is virtually maintenance free.

**We Have
The Solutions**

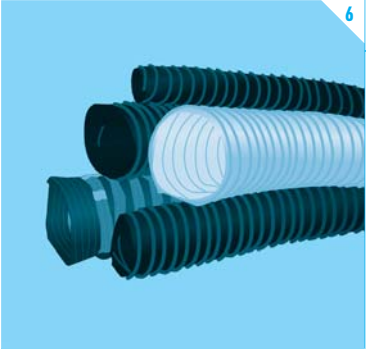

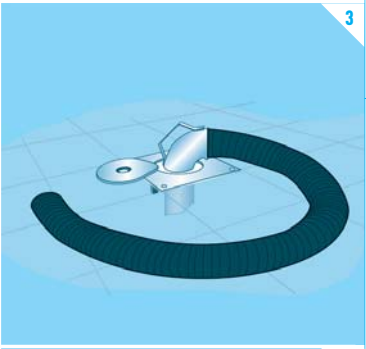

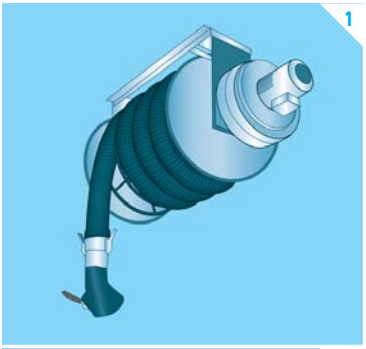

**The Right Solution for The Right Application
at The Right Price**

The NORFI philosophy for the extraction of exhaust gases from vehicle workshops is compelling for two reasons - quality and price. NORFI has over 30 years of experience within the exhaust extraction industry and has developed a wide range of products that are ergonomically efficient, user friendly and competitively priced.

Our customers benefit from our extensive product range developed over many years. There is only one manufacturer that offers innovative products that are user friendly and robustly produced: NORFI.

NORFI Standard Components

- 1 Exhaust Extraction Reels for Cars and Trucks**
Fixed mounting or moveable - mounted on extraction rail
- 2 Extraction Rails for Cars and Trucks**
Movable suction trolleys available with a range of extraction volumes
- 3 Underfloor Exhaust Extraction**
Hose stowage or plug in systems
- 4 Exhaust Adapters for Cars and Trucks**
to cater for a wide range of vehicles
- 5 Exhaust Nozzles**
Range available to suit all vehicles and applications
- 6 Exhaust Extraction Hoses**
Wide range of diameters and materials to suit all applications

Always a Step Infront

NORFI stands for over 30 years of competency in extraction technology. NORFI has a wide range of manufactured products and is staffed by experienced specialists.

NORFI provides extraction technology for every source of exhaust gas: from lawn-mowers to cars and trucks, from special vehicles to locomotives, from standard applications to special solutions.

Our standard begins where others end.
